

AI and the Future of Academic Integrity

As AI tools reshape education, we must confront complex questions about academic integrity in our digital landscape.

Maddie Shellgren, Ph.D.

Framing the Conversation

What is "original" work?

Traditional concepts of originality are being challenged by AI-generated content.

Who or what is the author?

Authorship becomes complex when AI contributes to creation.

What does meaningful assessment look like?

We must rethink how we evaluate learning in an AI-enhanced world.

AI in Education: Beyond Generative Tools

Generative AI

Content creation and language modeling tools that produce original work.

Predictive AI

Analytics and alerts that forecast student performance and needs.

Adaptive AI

Personalized learning experiences and tutoring based on student data.

Surveillance AI

Proctoring and behavior monitoring systems for assessment.

Perspectives from the Field

Faculty Adaptation

- Confusion to creativity
- Evolving assignments
- AI in grading
- Professional development needs

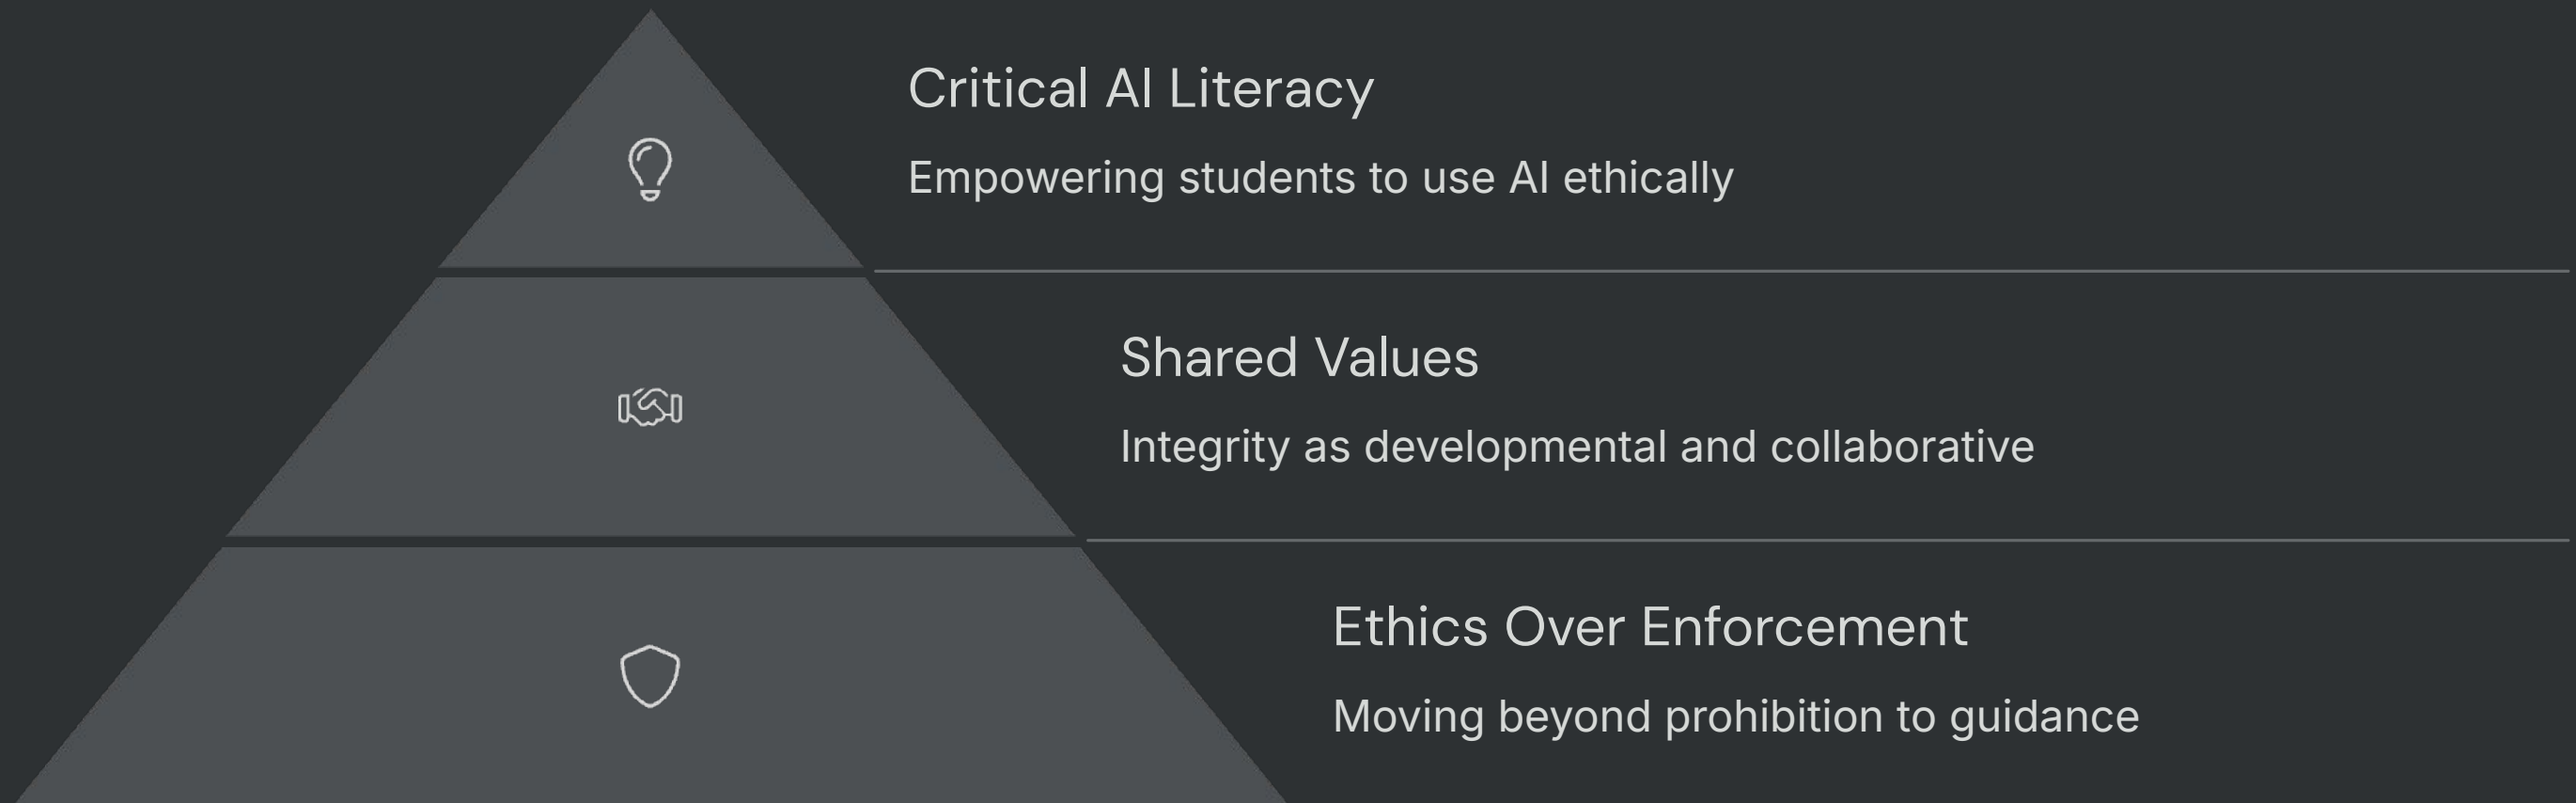

Student Use

- Empowerment opportunities
- Equity concerns
- Potential misuse
- Changing learning perspectives

Administrative Responses

- Policy gaps
- Proactive innovation
- Sustainable infrastructure

Rethinking Integrity: A Future-Oriented Lens

AI training advances job preparedness, making ethical AI use an essential skill for future careers.

Assessment Redesign Strategies

Scaffold AI Use

Guide students through appropriate AI integration at each learning stage.

Process Over Product

Evaluate the journey of creation rather than just final deliverables.

Reflective Components

Include student analysis of how and why they used AI tools.

Oral Assessments

Incorporate presentations to verify understanding beyond written work.

Strategic Practices for AI-Aware Institutions

Tool Landscape

- Detection tools and their limitations
- Assistance tools and ethical considerations

Policy Strategies

- U.S. Executive Order on AI
- Balancing consistency with academic freedom

Equity Considerations

- Addressing access gaps
- Ensuring fair implementation
