Re: HETS Academy

To the HETS Academy Review Team:

The project I would like to implement is making our online orientations more accessible beyond ADA compliance. I would like to see the orientations and onboarding materials be more inclusive of students from other cultures, include resources we have on campus for different populations, review word choices, etc. It is part of our university's and Southeast Online's mission to include access; hence, I want to focus on making the materials more accessible to broader student populations.
