

Academic Affairs Office

Projects to be developed online:

1. Online Division Campus

It is planned to create a complete campus for the online division where all the student's needs are met virtually. The programs already approved and authorized by the JIP and MSCHE will be used. The Online division will be in charge of developing new programs completely online.

This division will have all the departments needed for a regular branch: admissions, financial aid, counseling, registrar, library, academic coordinator, director, health coordinator, content developers, faculty facilitators, and student monitoring, in short, all the components of a regular campus.

2. Implementation of SARA (State Authorization Reciprocity Agreement)

SARA provides a streamlined, reciprocity-based process for participating postsecondary institutions to gain approval to offer interstate distance education in SARA member states without individually applying to each state for such approval, subject to certain limitations. ICPR Junior College should complete the Institutional Portal for online students and the necessary documentation to apply to SARA. SARA's authorization will allow the sale of programs online in the United States. Completing the institutional portal allows us to create the base of the online division in turn.
