Kingsborough Community College:

Project: Becoming a Hispanic Serving Institution

My project will be implemented in the enrollment and admissions information center at Kingsborough Community College. I will have an emphasis in the recruitment of our LatinX community college students. Our main mission is to become an HSI- Serving institution. Which means that we want to become a Hispanic Serving institution. Through recruitment initiatives and budget specifically for this major project, we have implemented a new location outside of our main campus to provide information, support students, and guide them through the right steps to become college ready.

Next, our project will be based not only in our CUNY-Brooklyn surrounding but also in recruiting and admitting students from all over the world. I am very excited to be doing a project this big, because I know that is going to open a lot of new doors, experiences and opportunities to many more students.

Our team is passionate and very happy to be working towards a goal that we know is going to bring many amazing things to our institution. Higher education is and will always be a place of growth for many students and individual who want to accomplish many goals in their life.
